Hosted by a consortium of four Thai universities:

Foreword

The **Ninth ASEAN Education Ministers Meeting** (May 2016, in Malaysia), in conjunction with the **Third ASEAN Plus Three Education Ministers Meeting**, and the **Third East Asia Summit of Education Ministers** hold a number of promises. With the theme “**Fostering ASEAN Community of Learners: Empowering Lives through Education,**” these meetings distinctly emphasized children and young people as the collective stakeholders and focus of cooperation in education in ASEAN and among the Member States. The Ministers also affirmed the important role of education in promoting a better quality of life for children and young people, and in providing them with an opportunity to participate in and benefit from the realization of a prosperous ASEAN Community 2025. They highlighted the need to deepen the scope of education partnership among ASEAN Member States towards the development of a more coordinated, cohesive and coherent ASEAN position and contribution to global education issues. The ASEAN Work Plan on Education 2016-2020 which they adopted hopes to unify all collaboration efforts on education with ASEAN Dialogue Partners and international organizations and other entities that support ASEAN.

The ASEAN Work Plan on Education focuses on eight areas:

- ASEAN awareness through strengthening Southeast Asian history and indigenous knowledge
- quality and access to basic education for all especially the marginalized groups
- information and communication technologies in education
- technical and vocational education and training (TVET) and lifelong learning
- Education for Sustainable Development (ESD)
- higher education development and quality assurance mechanisms
- university-industry partnership
- capacity building for teachers and the education community.

The International Association of Universities (IAU) shares several of these focus areas, notably the focus on indigenous knowledge, quality, access and ESD among others. The Association also applauds the promotion of academic mobility and the Ministers’ endorsement of the ASEAN

Qualifications Reference Framework (AQR) Governance and Structure, and the plans to institutionalize the AQR processes on a voluntary basis at the national and regional levels. All these will help enhance quality, credit transfer and student mobility, as well as university collaboration and people-to-people connectivity which are all crucial in realigning the diverse education systems and opportunities, as well as creating a more coordinated, cohesive and coherent ASEAN.

The IAU is particularly pleased to note that the Meeting approved the revised Charter of the **ASEAN University Network (AUN)**, better aligned with the new developments in ASEAN. The AUN and IAU have been collaborating as partners in advancing the role of education regionally and worldwide by building a committed community of learners. Both associations are aware of the importance of the various networks and projects that exist in the region, including: *AUN Southeast Asia Engineering Education Development Network (AUN/SEED-Net)*, *ASEAN-EU Cooperation on Education: EU Support to Higher Education in ASEAN Region (SHARE)*, *GIZ Regional Cooperation Programme to Improve the Training of TVET Personnel (RECOTVET)*, *Fulbright U.S.-ASEAN Initiative*, and *Connecting the Mekong through Education and Training (COMET)*.

With this inaugural publication which attempts to provide as much information as possible about the higher education systems and institutions in the ASEAN region in a comprehensive and reliable manner, IAU hopes to help facilitate deeper education cooperation on the basis of accurate data.

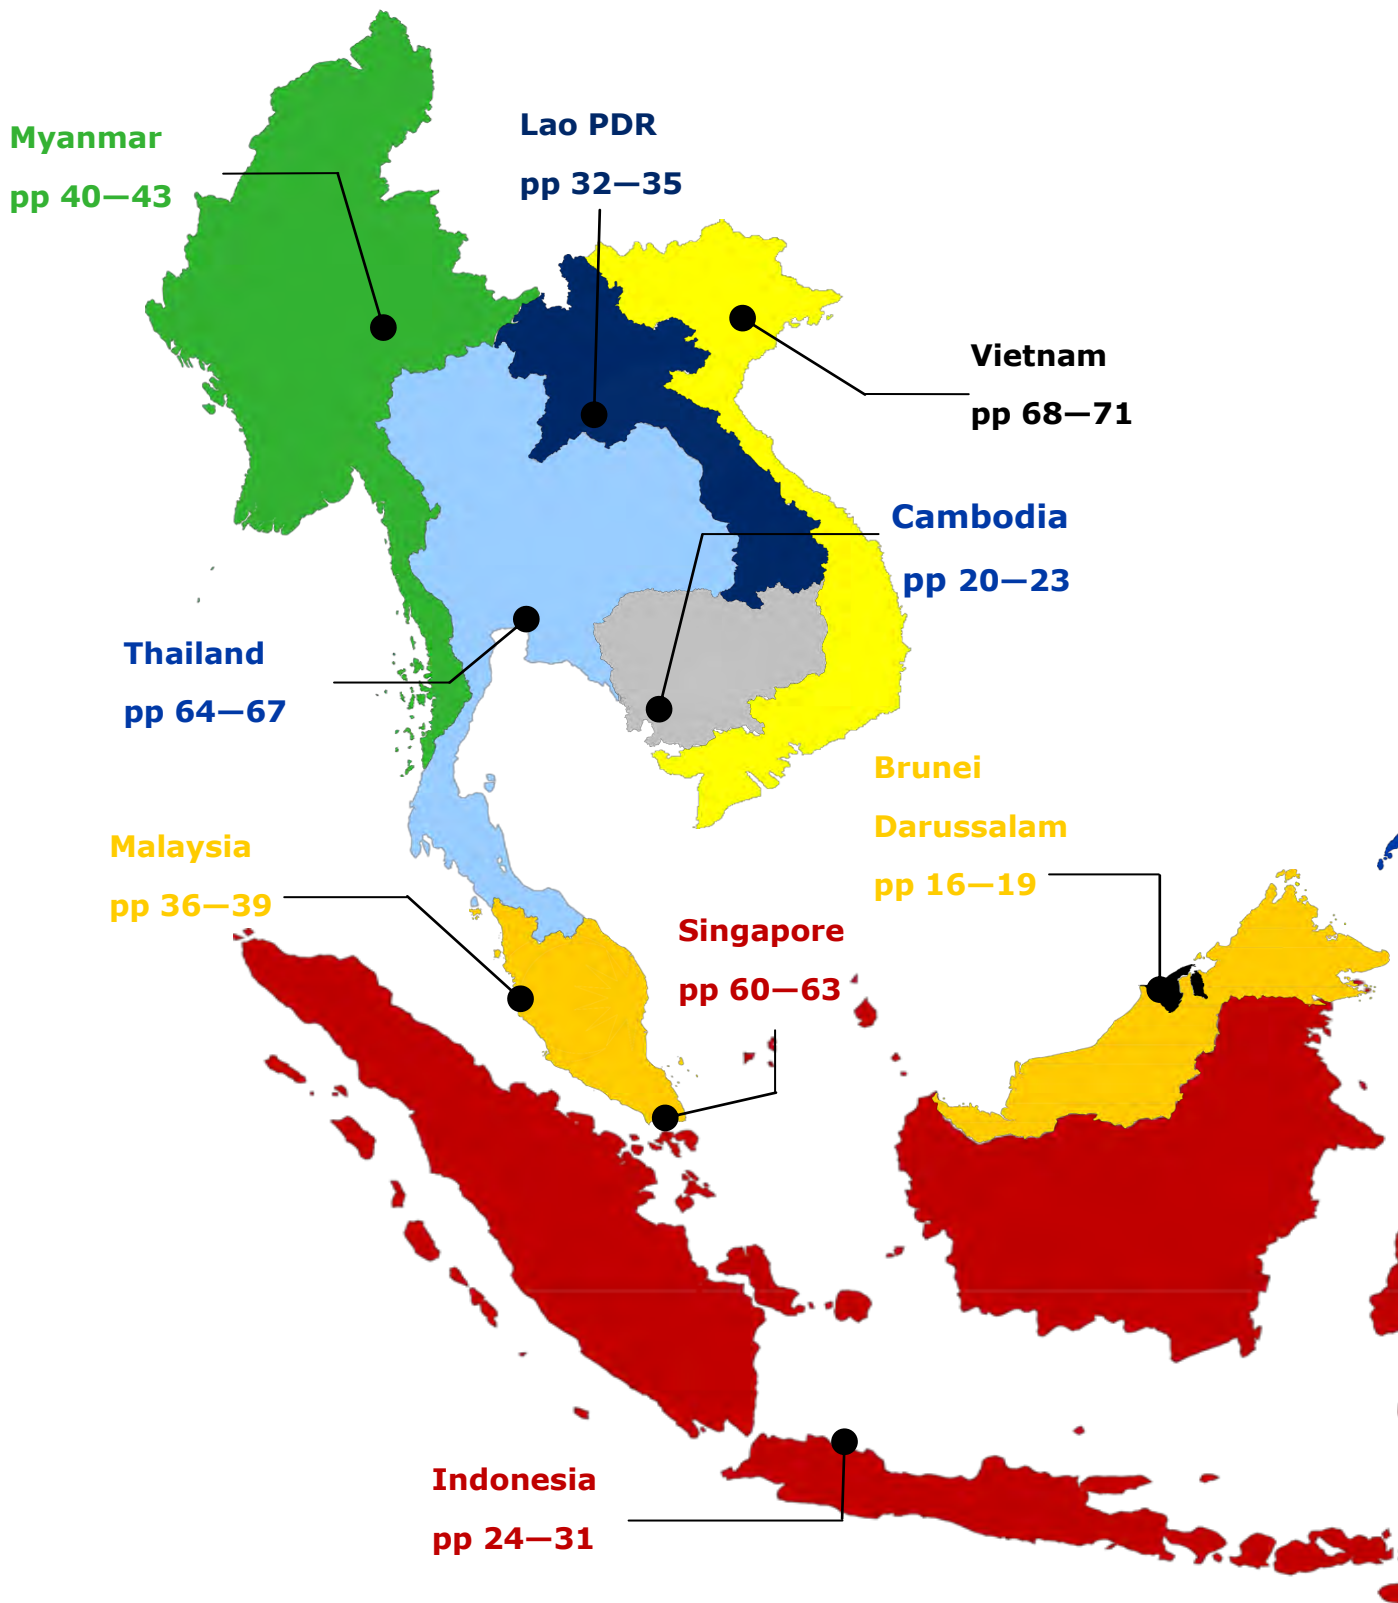

It is significant and timely to celebrate 2016 as the first year since ASEAN became a Community, and concomitantly the first year for the implementation of the ASEAN Vision 2025. We congratulate the emerging ASEAN Community, in particular the education sector, and thank all partners and universities for making this unique and historic publication possible.

Best wishes and warm regards,

Dzulkifli Abdul Razak

The International Association of Universities

INTERNATIONAL ASSOCIATION OF UNIVERSITIES
ASSOCIATION INTERNATIONALE DES UNIVERSITES
INTERNATIONAL UNIVERSITIES BUREAU BUREAU INTERNATIONAL DES UNIVERSITES

The International Association of Universities (IAU) is an international NGO, official partner of UNESCO (associate status), based at UNESCO's headquarters in Paris. IAU is a membership organisation with a vast worldwide network of institutions of higher education institutions and international, regional and national university organisations as Members. It provides a wide variety of services to its Member Institutions and Organisations and to the international higher education community at large. Since its founding in 1950, IAU has been steadily growing and building a worldwide higher education community worldwide, now bringing together more than 650 institutions and organizations from around the globe.

IAU's Vision is:

To be the most representative and influential global association of diverse higher education institutions and their organisations, promoting and advancing the dynamic leadership role for higher education in society.

IAU promotes collaboration among its Members by articulating the fundamental values and principles that underpin the pursuit, dissemination and application of knowledge. The Association advocates for higher education policies that respect diverse perspectives and promote social responsibility. It encourages innovation, mutual learning and cooperation among institutions.

IAU serves the needs of its Members in various ways. It convenes truly global conferences, meetings and seminars; acts as the voice and advocator for higher education in international settings (e.g. UNESCO, OECD, World Bank, etc.); conducts research and publishes original research through its quarterly journal **Higher Education Policy**; provides information on scholarly publications through the **interactive bibliographic database (HEDBIB)** and collects information on higher education systems, institutions and qualifications (as

exemplified in this publication) to make it available in the **World Higher Education Database (WHED)**. IAU engages in capacity building through its twice-yearly professional development programme "**Leading Globally Engaged Universities (LGEU)**" and offers policy advice as part of the IAU programme for advancing internationalization: **ISAS 2.0 (Internationalization Strategies Advisory Service)**.

As a global platform closely linked to UNESCO and other UN agencies, IAU is deeply committed to mobilizing higher education institutions to play their full role in addressing sustainable development and to be active in the new 2030 Development Agenda. The Association's Portal on **Higher Education for Sustainable Development (IAU-HESD.net)** is a virtual meeting place of experts and actors where they can share information on their actions to realize sustainable development through curriculum, research and outreach.

Always staying on top of the most pressing developments in higher education around the world, IAU also undertakes other projects and activities in line with its principles and values and responding to the Members' needs. Yet, as regional integration and regional community building takes on increased relevance, IAU also focuses on the specific issues and interests of various regions, bringing to the regional focus the global perspectives and more than 60 years' experience in the field.

HIGHER EDUCATION IN ASEAN

The IAU publishes **Higher Education in ASEAN** on the occasion of its 15th General Conference, taking place in Bangkok, Thailand, in order to showcase the ASEAN institutions and systems of higher educations. Under the broad theme **Higher Education: A catalyst for innovative and sustainable societies**, the 15th IAU General Conference will focus on sharing strategies and practices that demonstrate how higher education institutions contribute to innovation and sustainability. Equally important, the Conference will determine what more HEIs can do, especially through IAU, to become true catalysts for change.

World Higher Education Database

world higher education database

WHED

International Association of Universities' Worldwide Database
of Higher Education Institutions, Systems and Credentials

Since the creation of the IAU in 1950, the Association has acted as a global repository and clearing house of information on higher education worldwide. Starting more than six decades ago with only a small booklet containing information on the few universities in the world, today IAU maintains the World Higher Education Database (**WHED**) which includes close to 18,000 higher education institutions (HEIs).

The importance of knowledge in today's society and economy is clear from the exponential rise in the number of HEIs around the world as well as from the attention decision-makers pay to reforms of the HE systems in an on-going effort to make them more productive and effective. Last but by no means least, for individuals, the qualifications granted by HEIs have become an essential key to success.

Alongside this expansion and these transformations, technological progress has revolutionized the way information about HE is provided and accessed. This has brought both positive and negative consequences. There is no doubt, however, that nowadays reliable, comprehensive and up-to-date information is of utmost importance to many stakeholders.

IAU has continuously adapted to all of these transformations and improved both access to content of its information.

The **WHED**, updated regularly in cooperation with UNESCO, is a dynamic, fully searchable online database which includes comparable information on the **structure** of the higher education systems, the **degrees** and **diplomas**, and **HE institutions** that offer at least a professional or a post-graduate degree in each country. Though the IAU is not an accrediting body, the WHED includes only those HEIs that are recognized by the national competent bodies (provided to IAU by such competent bodies or found on their official website).

Higher Education in ASEAN is based, to a large extent, on data found in the WHED and provides information on the ten countries that form ASEAN: Brunei Darussalam, Cambodia, Indonesia, Lao PDR, Malaysia, Myanmar, Philippines, Singapore, Thailand and Vietnam. These nations differ in size, history, language and tradition, yet they share a strong commitment to education. There are 2,328 HEIs in ASEAN (May 2016) and while they are by no means distributed evenly among the ten nations, almost in all countries, the numbers are on the rise.

The HE systems of the ASEAN Members are also different, and in addition to listing all of the HEIs in each country, **Higher Education in ASEAN** uses the higher education credentials offered to depict the learning paths in each system.

Guide to this Publication

Country Overview

Each country description begins with important key facts, followed by an overview about the education and particularly higher education (HE) system. The page includes a graph of the credentials offered in the HE system; mentions recent laws, decrees and strategic plans that may have been adopted and lists the national bodies responsible for HE.

List of Higher Education Institutions (HEI)

The list of Higher Education Institutions (HEI) includes all those found in the WHED (May, 2016). The WHED only includes officially recognised institutions that offers at least a 4 year professional degree and that has graduated at least one cohort of students. The HEIs are sorted by city and are listed by the most commonly used name. Pictures and logos are from IAU Member institutions and from HEIs which agreed to sponsor this publication.

ASEAN and its Member States

The **Association of Southeast Asian Nations**, or ASEAN, was established on 8 August 1967 in Bangkok, Thailand, with the signing of the ASEAN Declaration (Bangkok Declaration) by Indonesia, Malaysia, Philippines, Singapore and Thailand. Brunei Darussalam joined in 1984, Vietnam in 1995, Lao PDR and Myanmar in 1997, and Cambodia in 1999, creating what is today the ten Member States of ASEAN.

As set out in the ASEAN Declaration, the aims and purposes of ASEAN are:

1. To accelerate the economic growth, social progress and cultural development in the region through joint endeavours in the spirit of equality and partnership in order to strengthen the foundation for a prosperous and peaceful community of Southeast Asian Nations;
2. To promote regional peace and stability through abiding respect for justice and the rule of law in the relationship among countries of the region and adherence to the principles of the United Nations Charter;
3. To promote active collaboration and mutual assistance on matters of common interest in the economic, social, cultural, technical, scientific and administrative fields;
4. To provide assistance to each other in the form of training and research facilities in the educational, professional, technical and administrative spheres;
5. To collaborate more effectively for the greater utilisation of their agriculture and industries, the expansion of their trade, including the study of the problems of international commodity trade, the improvement of their transportation and communications facilities and the raising of the living standards of their peoples;
6. To promote Southeast Asian studies; and
7. To maintain close and beneficial cooperation with existing international and regional organisations with similar aims and purposes, and explore all avenues for even closer cooperation among themselves.

Kuala Lumpur Declaration on Higher Education

In the 27th ASEAN Summit 2015 in Malaysia, the meeting had adopted the **Kuala Lumpur Declaration on Higher Education** and had agreed to:

- I. acknowledge the critical importance of higher education as one of the **catalysts in accelerating ASEAN's** economic, political and sociocultural development agenda
- II. uphold quality in the provision of higher education across all member states;
- III. enhance academic contribution of ASEAN higher education within the global academic community;
- IV. embrace diversity and solidarity of the ASEAN Community through enhanced intra-ASEAN mobility of students and scholars;
- V. contribute to the promotion of peace, prosperity, resilience, and vibrancy of ASEAN through synergised collaboration between the academia, industry, government and community;
- VI. foster sustainable local community development through participation of youth, professionals and volunteers in entrepreneurial endeavours;
- VII. build an innovation-driven ASEAN Community with critical thinking capability and skill through capacity building offered by higher education institutions within ASEAN, such as opportunities for lifelong learning, technical and vocational education and training (TVET), online and blended learning, postgraduate education, transnational education and other flexible learning options;
- VIII. contribute to sustainable development through academic programmes, research, community development and stakeholder engagement;
- IX. increase visibility of ASEAN globally through increased thought leadership in various disciplines of higher education at regional and international levels;

The meeting also expressed the commitment to the aspirations and guiding principles in promoting a people-oriented and people-centred ASEAN through cooperation in higher education.

ASEAN University Network

During the 4th ASEAN Summit in 1992, ASEAN leaders called

for the strengthening of the region through the promotion of human resource development and higher education. This aspiration has led to the signing of the Charter of the ASEAN University Network and thus the establishment of ASEAN University Network (AUN) in November 1995 with the AUN Secretariat established in Bangkok, Thailand. Since its establishment, AUN, the network of leading universities, has been serving as ASEAN's implementing agency in the field of higher education for the region's move towards ASEAN Community.

In terms of organisational structure, the structure can be categorised into 3 levels.

- **Policy level** consists of the AUN Board of Trustees (AUN-BOT).
- **Implementing level** consists of AUN Member Universities who participate and implement the programmes and activities under AUN. Currently, AUN membership

has extended to 30 leading universities throughout ASEAN and the ASEAN+3 University Network, which includes 10 universities from China, Japan and Korea, was established in 2012.

- **Coordinating and monitoring level** is served by AUN Secretariat.

The functions of the **AUN Secretariat** also cover planning, organising, coordinating, monitoring and evaluating AUN programmes and activities. The **AUN Secretariat's tasks also include** developing ideas, innovations and proposal for cooperation under AUN as well as to develop plans and mechanisms for sourcing and generating funds for self-reliant and self-sustaining operation of AUN.

AUN works closely with ASEAN Secretariat in reporting progress and proposing initiatives for further intra-regional and inter-regional cooperation in higher education.

Quick Facts about Brunei Darussalam

Population	417,400
GDP	17.10 billion
Human Development Index	0.856 (31)
Size (Sq. km)	5,765
Gross Enrolment Ratio (%)	32
Higher Education Institutions	4
Languages of Instruction	Malay, English

Recent Laws/Decrees and Strategic Plans in HE:

- Strategic Plan 2012—2017
- Education Act (2003)

students can proceed to the pre-university level (Sixth Form Level), pursue vocational education in a technical or an engineering college, or seek employment.

Brunei Darussalam is the smallest ASEAN country in terms of population, with only 417,400 people living in this small state. The country is considered a high income (non-OECD) country by the World Bank, ranked second highest in the Human Development Index in the region.

The education system is based on the **Education Act of 2003**. The Ministry of Education's **Strategic Plan 2012-2017** is part of 'Brunei Vision 2035'. It aims at enhancing the structures of the education system and therefore make the education system in Brunei Darussalam one of the best worldwide

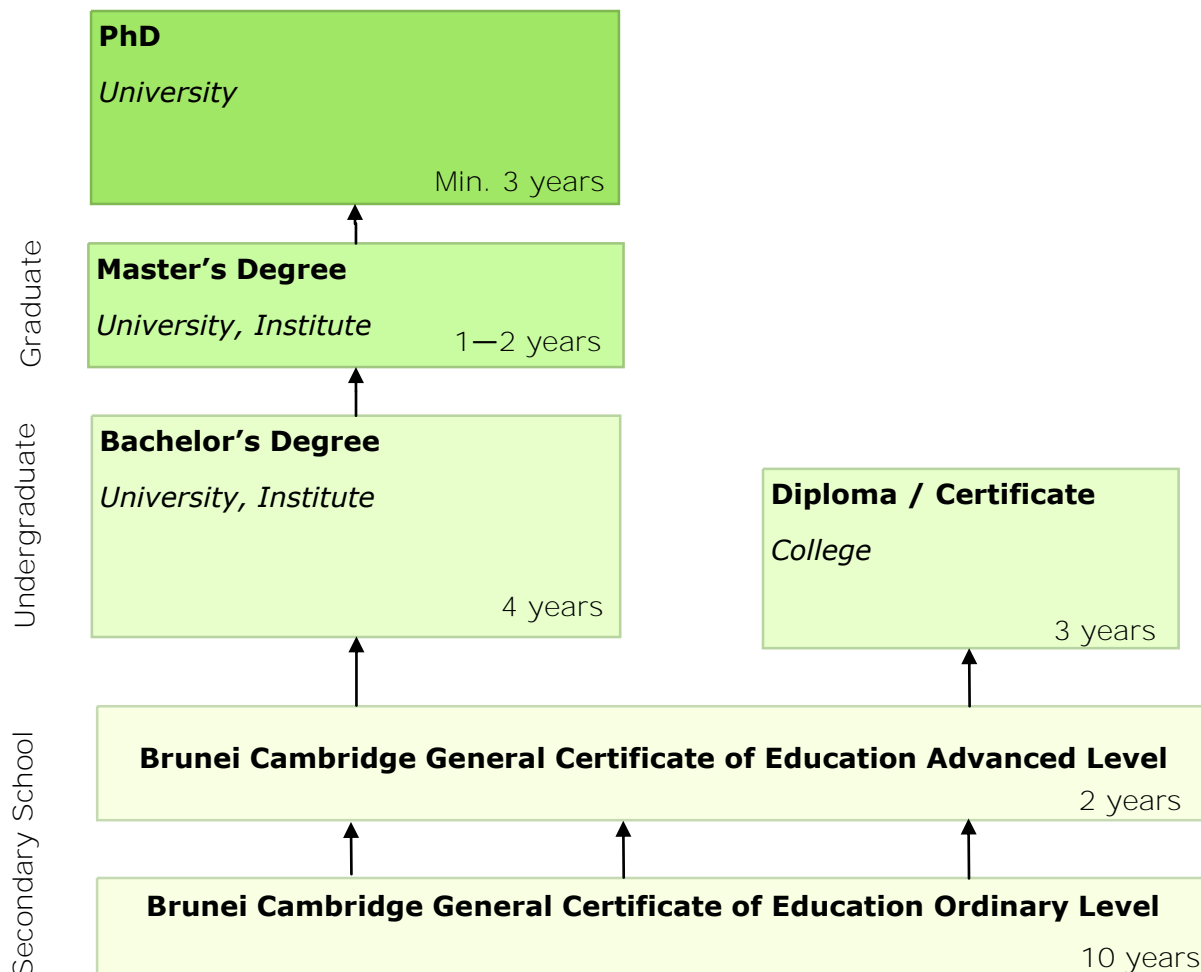

Children enter the **education system** at the age of 5 and stay at the pre-school level for one year. **Primary education** lasts six years and is divided into lower (Year 1 to Year 3) and upper (Year 4 to Year 6) primary education. At the end of Year 6, pupils sit for the Primary School Assessment or Penilaian Sekolah Rendah (PSR). In **secondary education**, the majority of students will spend five years (four years for highly capable students) before they can take the Brunei-Cambridge General Certificate of Education (GCE) O-level examinations at the end of Year 10 or Year 11. Upon completion of their secondary education,

To **enter tertiary level education**, students must have completed 'A' level courses with adequate and relevant passes. Tertiary education is provided by universities, one polytechnic, institutes, and colleges. It is offered at both public and private institutions.

The **higher education system** is divided into three levels, according to qualifications as follows: Bachelor, Master and Doctorate. The Brunei Darussalam National Accreditation Council, a unit under the Ministry of Education, is in charge of assessing the qualifications awarded by local and overseas higher education institutions/universities.

Higher Education Policy

The quarterly journal of the International Association of Universities (IAU)

Member organisations of the IAU receive a **free subscription** to *Higher Education Policy*: www.iau-aiu.net

Higher Education Policy is an international peer-reviewed journal, indexed in the Social Sciences Citation Index (SSCI)®, for advancing scholarly understanding of the policy process (development, implementation, impact and responses) applied to higher education.

It does so through the publication of original analyses: theoretical, empirical or practice-based. Empirical or practice-based contributions will be theoretically or conceptually embedded. The focus of the analysis ranges from case studies of developments in individual institutions to policy-making at system and supra-national levels.

Quick Facts about Cambodia

Population	15.3 million
GDP	\$ 16.78 billion
Human Development Index	0.555 (143)
Size (Sq. km)	181,035
Gross Enrolment Ratio (%)	16
Higher Education Institutions	37
Languages of Instruction	Cambodian, English, French

Recent Laws/Decrees and Strategic Plans:

- Royal Decree on the Creation of the Supreme National Council for Education (2009)
- Education Law (2007)
- Royal Decree on the Accreditation of Higher Education (2003)
- Law on the Establishment of the Ministry of Education, Youth and Sport (1996)

Cambodia was the last country to join ASEAN in 1999. According to the World Bank it is a Low Income country. Cambodia shares borders with Lao PDR, Thailand and Vietnam. 37 Higher Education Institutions can be found in Cambodia, most of them in the capital Phnom Penh. Cambodia is one of the least developed countries in the world according to the Human Development Index. It further features only an enrolment ratio in tertiary education of 16%, ranking on the second to last place in ASEAN.

Primary education (1st Phumaseksar) lasts for six years. **Secondary education** (2nd Phumaseksar) is divided into two three-year cycles: lower secondary and upper secondary. Primary and lower-secondary education are compulsory.

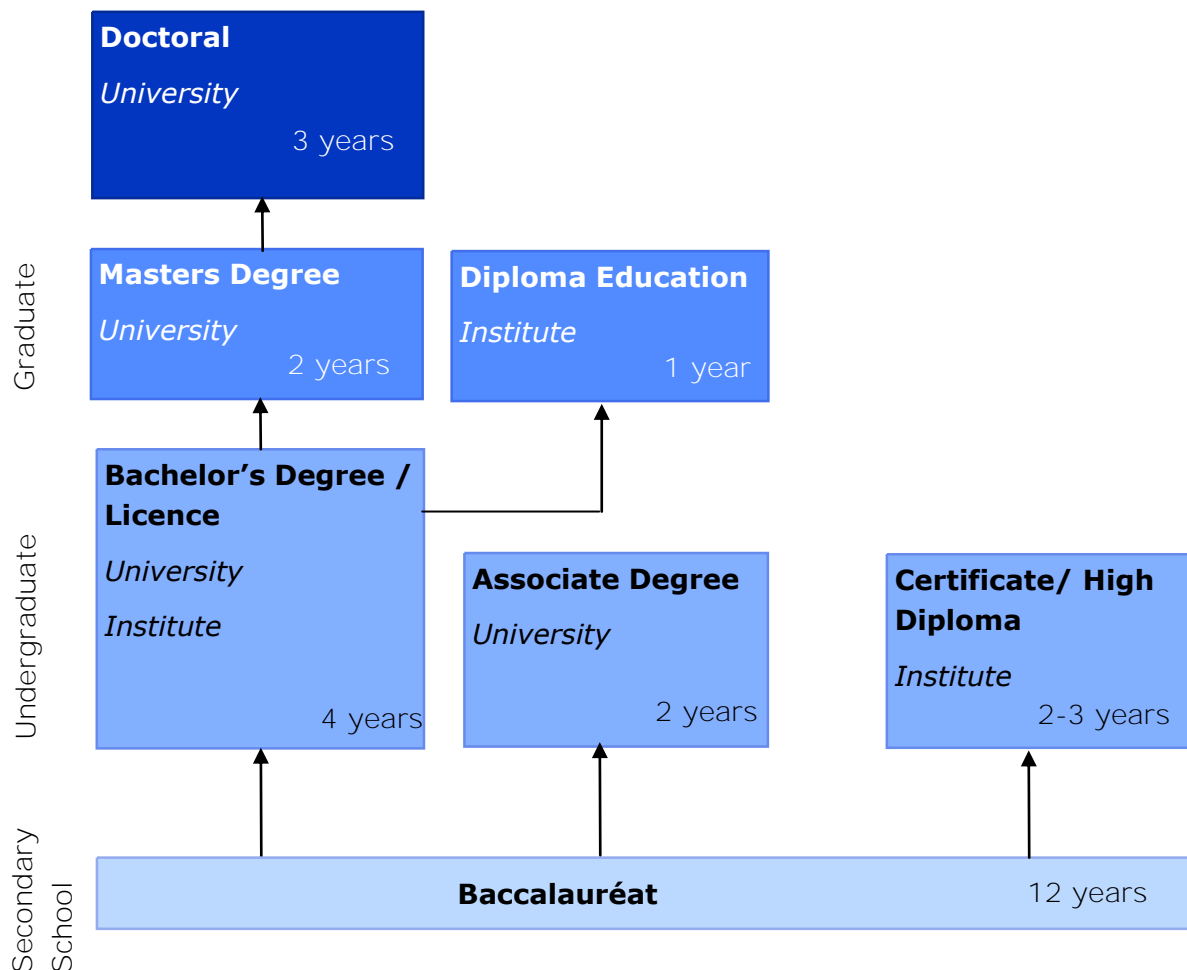

Higher education is the third level (3rd Phumaseksar) of education. It falls under the responsibility of the Ministry of Education, Youth and Sport. It is composed of two types of institutions: universities and institutes that can be public or private.

The Accreditation Committee was created to develop the standards of education and to assess higher education quality.

Teacher education is separated into lower and upper secondary education. While teachers for lower secondary education can receive training at regional teacher training centres, teachers for upper secondary education need a **bachelor's degree first, after which they can go to the National Institute of Education for a diploma of education or upper secondary school teacher.**

In 2015, the IAU launched a unique professional development programme. Bringing together about 20 senior Higher Education representatives in leadership positions from all over the world, LGEU combines **engaged debate about strategic leadership issues** in higher education, with structured **peer-learning exercises** that underline unique aspects of working in an inter-cultural and globalized context. LGEU also offers opportunities to learn about the institutions, country and region in which each session takes place through **meetings and visits with senior representatives of local institutions and organizations.**

Quick Facts about Indonesia

Population	254.5 million
GDP	\$ 888.5 billion
Human Development Index	0.684 (110)
Size (Sq. km)	1,910,931
Gross Enrolment Ratio (%)	31
Higher Education Institutions	546
Languages of Instruction	Bahasa Indonesia

Recent Laws/Decrees and Strategic Plans:

National Education Systems Law No. 20 (2003)
Higher Education Act (2012)

Indonesia is not only the country with the biggest population in ASEAN, but also the fourth most populous country in the world making it the country with the biggest Muslim population. The country is spread out over many diverse islands, with the capital Jakarta on the main island Java.

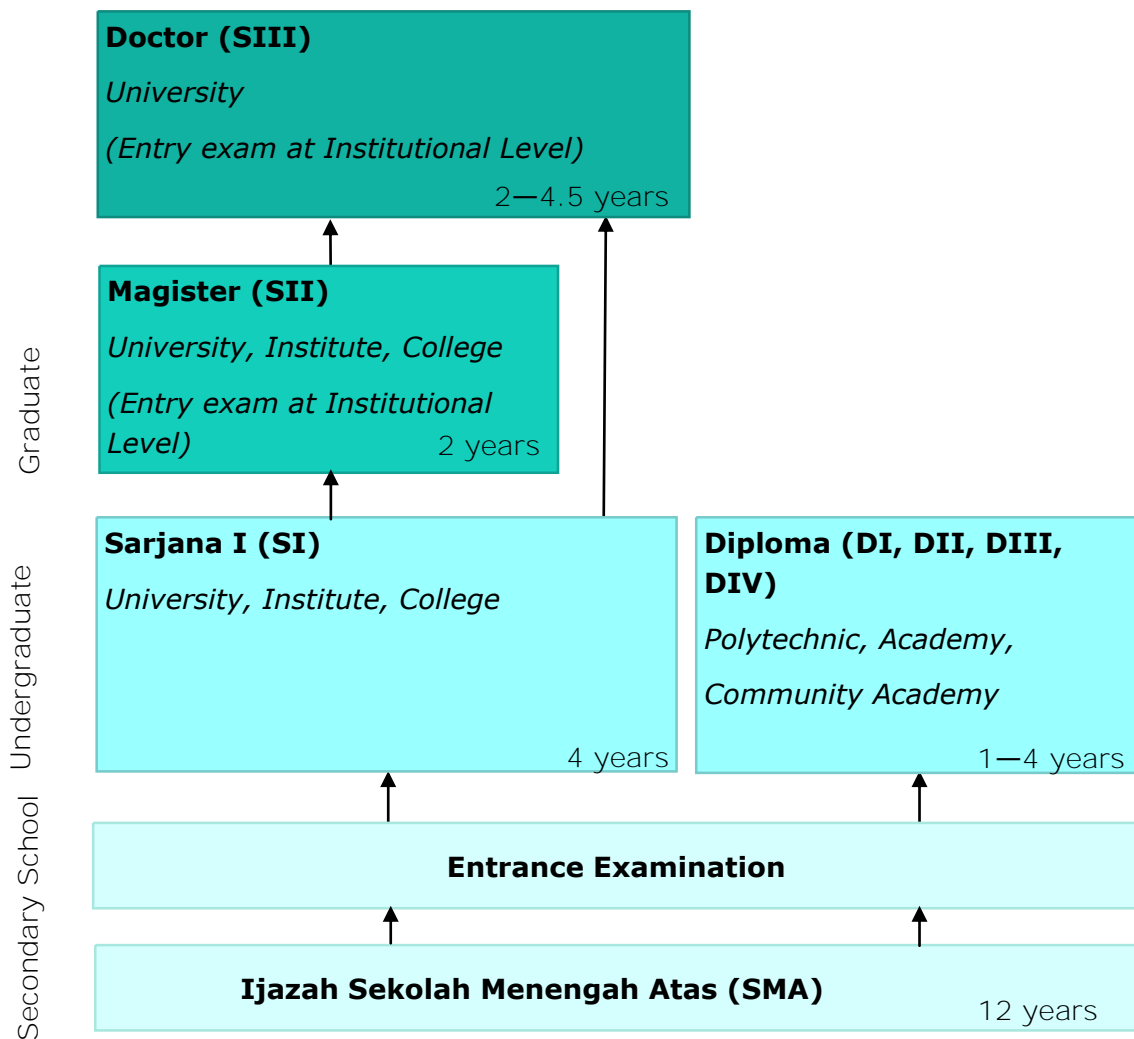

Basic education in Indonesia consists of 9 years of compulsory education. **Primary education** lasts for six years. **Secondary education** is divided into junior, senior and vocational/technical education. Junior **secondary school** covers three years and is part of the basic general education programme also covering the six years of primary education. **Senior secondary school** also covers three years. There are several types of secondary schools: general, Islamic and vocational. In the third year of senior secondary school, students choose between Natural Sciences, Social Sciences and Languages. Graduates of the senior secondary schools obtain the Sekolah

Menengah Atas which is a prerequisite for access to higher education (together with an entrance exam).

Higher education is mainly offered at private higher education institutions. It consists in universities (comprehensive set of disciplines), institutes (single field of discipline), academies (Sciences and Humanities), and polytechnics (Engineering). The latest two are vocational institutions.

The higher education **quality assurance system** comprises internal quality assurance conducted by the higher education institution and external quality assurance through accreditation. The accreditation of higher education institutions is conducted by the National Accreditation Board for Higher Education.

- Education Law (2007)
- TVET Master Plan 2008—2015

Ministry of Education. Credit transfers are subject to direct agreement between institutions.

Lao PDR offers various sorts of Diplomas to graduates of the secondary school. Those non-university degrees last two to five year. It is also the only country that does not normally offer doctoral education. Doctoral education is only offers in collaboration with foreign universities in very specific disciplines.

Lao People’s Democratic Republic

is the only landlocked country in ASEAN. It joined the Association in 1997 together with Myanmar. Only 6.6 million people are living in Lao PDR, making it one of the least populated countries in the region compared to its size.

Primary education lasts for five years, starts at 6 years of age and is compulsory.

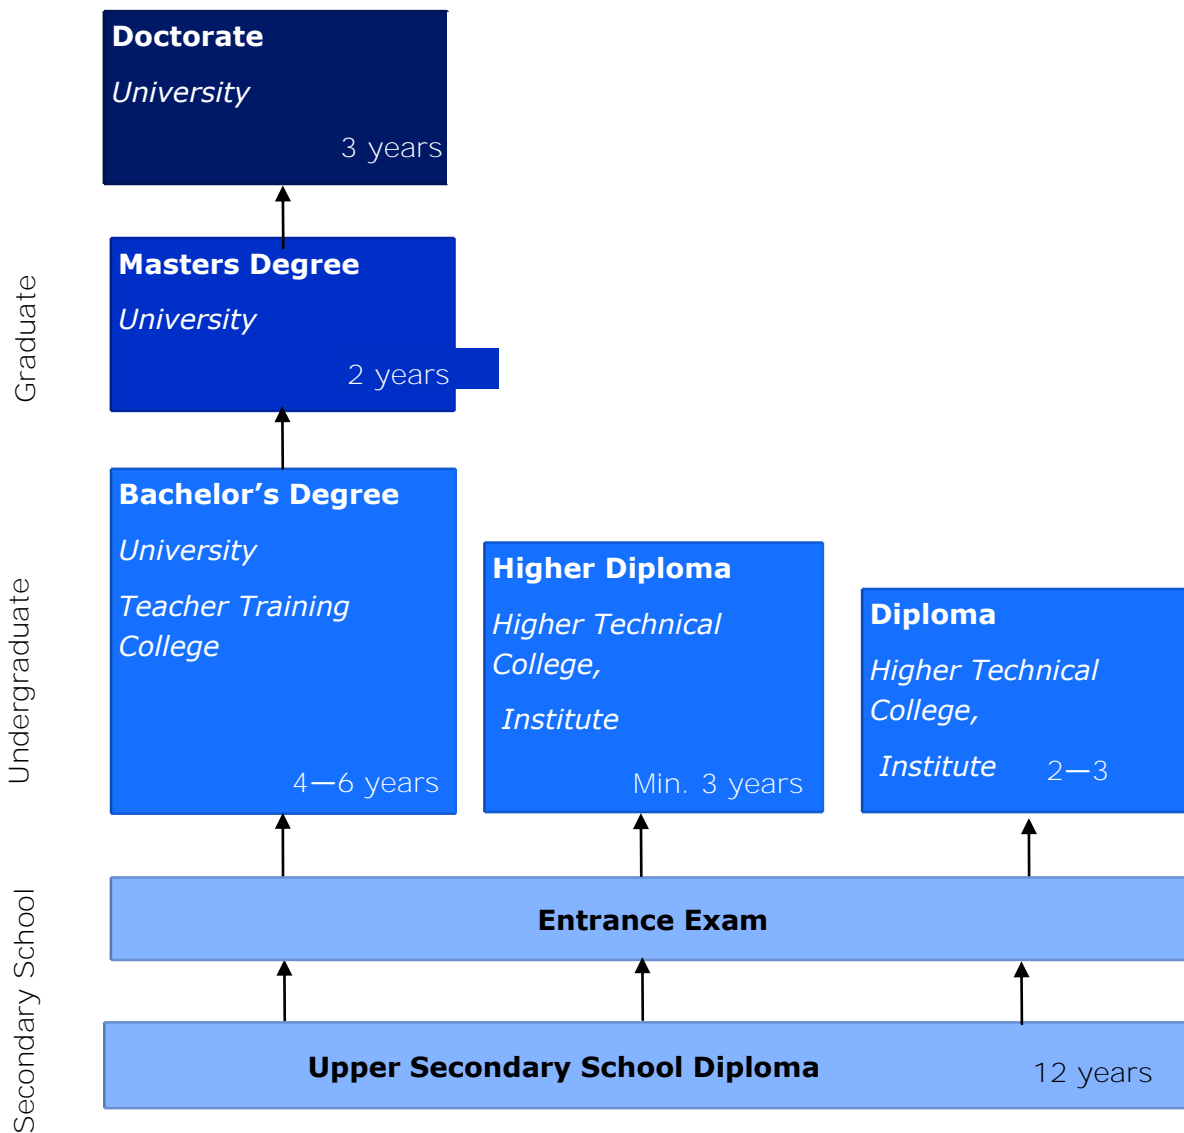

Secondary education lasts for 7 years and is divided into lower secondary and upper secondary. At the end of lower **secondary school**, pupils sit for the Lower Secondary School Diploma and at the end of upper secondary school they sit for the Upper Secondary School Diploma.

Higher education is provided by universities, technical and professional institutes, and teacher training colleges. Higher education institutions are managed by the government. They fall under the responsibility of the Ministry of Education or, in the case of the University of Health Sciences, the Ministry of Health.

All programmes offered at universities are officially recognized and accredited by the

HIGHER EDUCATION FOR SUSTAINABLE DEVELOPMENT

Higher education plays a key role in achieving the **2030 Development Agenda and related Sustainable Development Goals (SDGs)**. Leaders of universities and other higher education institutions, academic and administrative staff, students and other higher education stakeholders are driving the processes towards a more sustainable present and future.

The Higher Education and Research for Sustainable Development (HESD) portal is a tool developed by the **International Association of Universities (IAU)**; it provides access to actions and initiatives developed around the world. **Make sure you are part of it!**

www.iau-hesd.net

Innovative Approaches

to Doctoral Education in Africa

Innovative Approaches to Doctoral Education in Africa is one of the action areas of IAU. Started in 2009, the programme has now evolved into a networking platform about doctoral education in Africa.

The portal connects universities across the African continent and beyond; it aims at providing a basis for partnerships and exchange. But it does not stop here. It also brings researchers and funders together and offers a unique way to connect everyone interested in doctoral education, especially in Africa but also globally.

Resources range from the origins of PhD programmes, to supervision support, to funding opportunities. Information provided is to assist leaders, academics, administrators, technical support staff, students and researchers alike to easily find documentation and tools to increase their capacity.

- University and University Colleges (Amendment) Bill (2012)
- Private Higher Educational Institutions (Amendment) Bill (2012)
- Malaysian Qualifications Agency Bill (2007)

education institutions. The Ministry of Education supervises the education policy in the country.

The **Malaysian Qualifications Agency** (MQA) is responsible for quality assurance of higher education. MQA assures programmes through two distinct processes: (1) Provisional accreditation and (2) Accreditation: formal recognition that the certificates, diplomas and degrees awarded by the higher education institution are in accordance with the set standards.

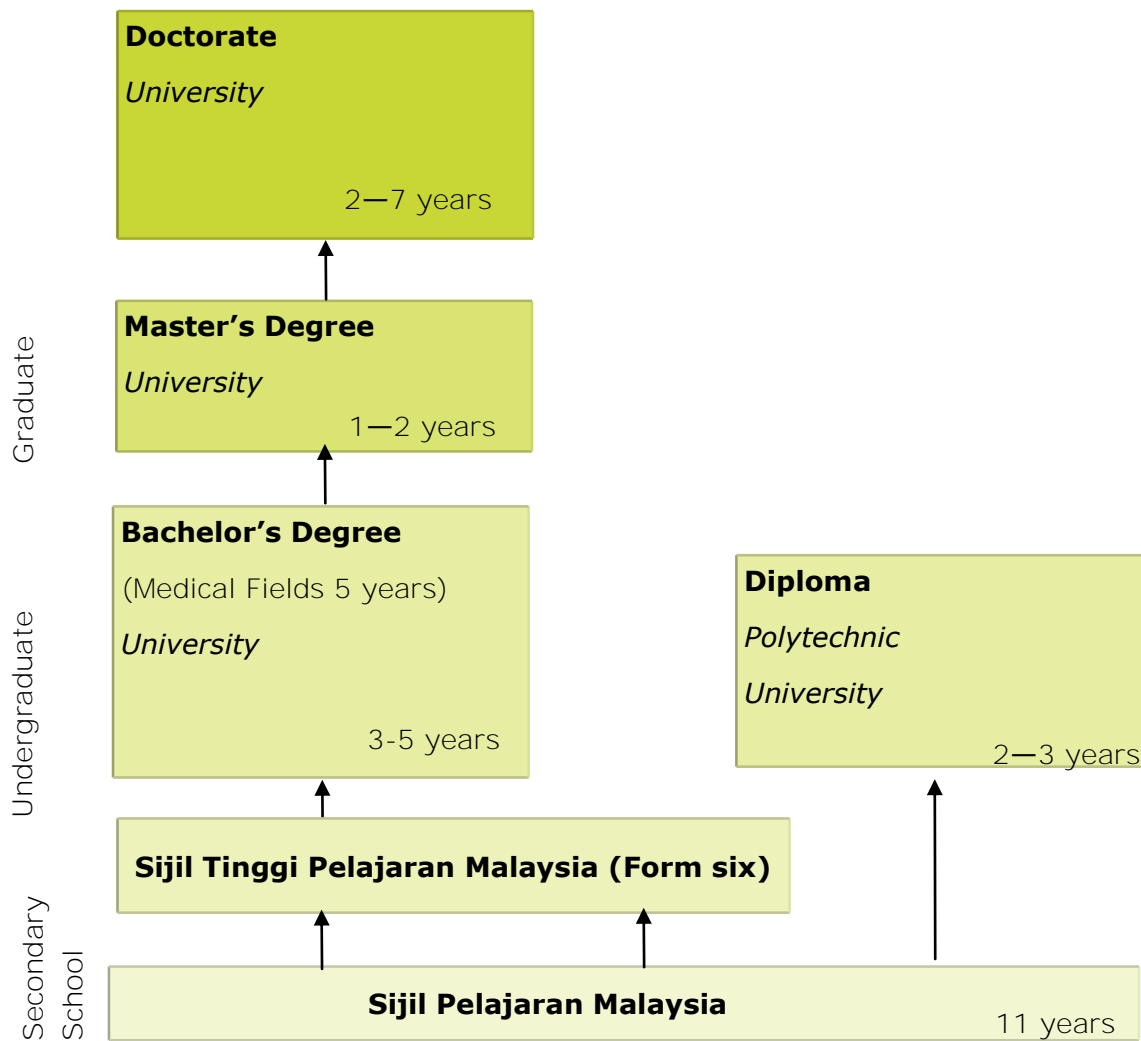

Malaysia consist of two parts, the smaller one is home to its capital Kuala Lumpur, while the bigger one is part of the Borneo. Malaysia recently published its **Education Blueprint**, aiming at changing and improving its education system by 2025.

Primary education lasts for six years and is compulsory. **secondary education** covers five years, divided into two stages: lower and upper. Upon completion of secondary education, students can opt to pursue 2 years of **post-secondary education** which is the university entrance preparatory course. At the end of the pre-university course, pupils take the Sijil Tinggi Pelajaran Malaysia.

Higher education is provided by universities, polytechnics, community colleges and colleges. There are both public and a wide variety of private higher

Quick Facts about Myanmar

Population	53.44 million
GDP	\$ 64.33 billion
Human Development Index	0.536 (148)
Size (Sq. km)	676,577
Gross Enrolment Ratio (%)	14
Higher Education Institutions	99
Language of Instruction	Burmese, English

Recent Laws/Decrees and Strategic Plans:

University Education Law (1973) (Amended in 1998)

Myanmar joined ASEAN 1997, one year before the University Education law from 1973 was amended. Since then, Myanmar has undergone many changes and is considered having a low Human Developing Index rank of 148 out of 185, separating it by 127 places to Singapore, who has the highest HDI in ASEAN. Myanmar has further the lowest gross enrolment ratio for tertiary education of the whole ASEAN.

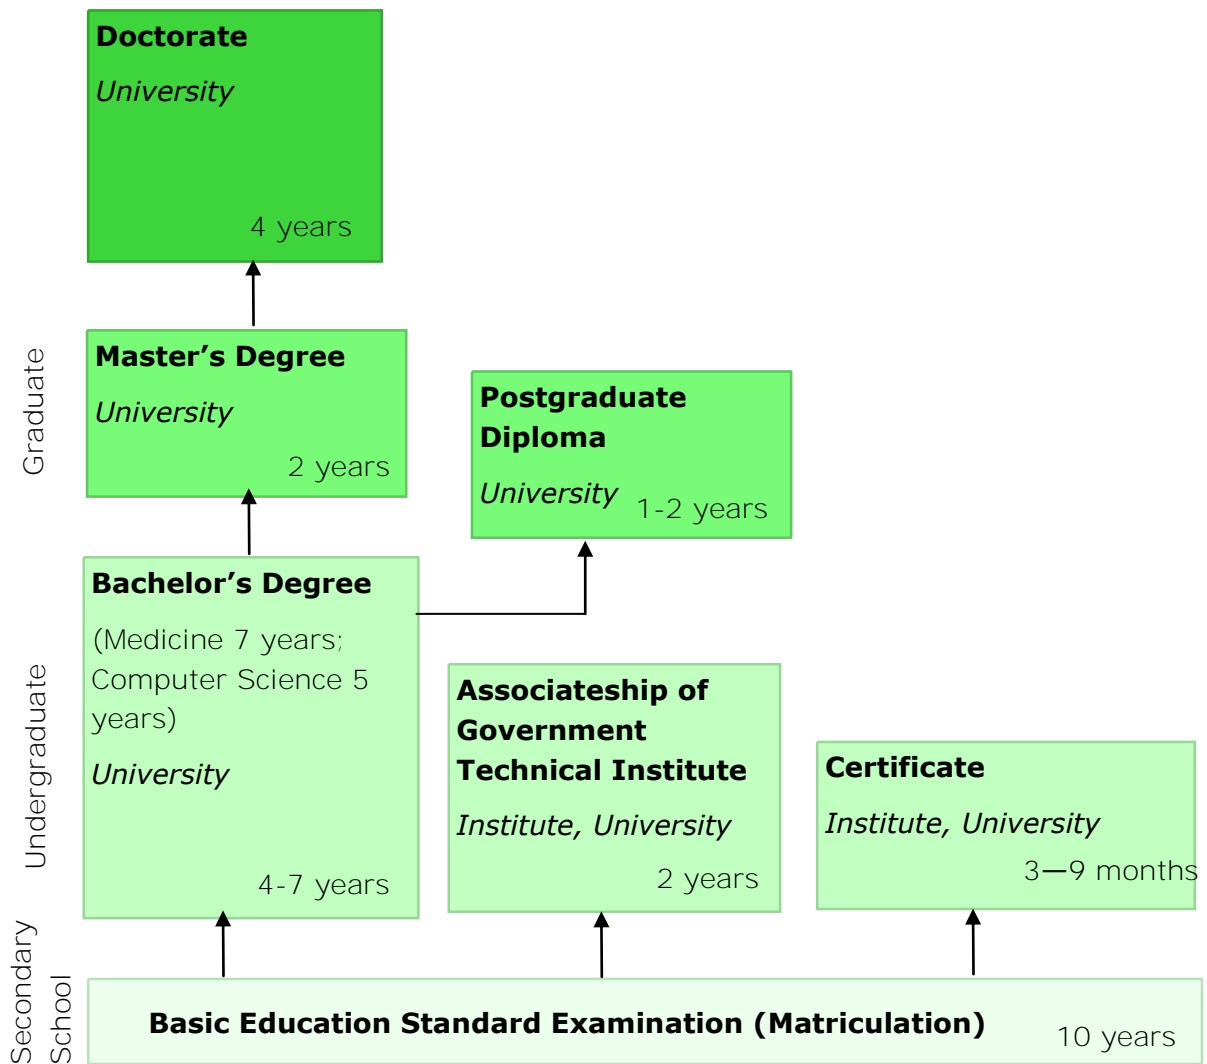

Primary education, the first stage of basic education is, in principle, compulsory. It lasts for five years. **Secondary education** is divided into middle schools and high schools and lasts for six years.

Higher education is provided by military universities, universities and institutes. They are all State institutions. Most of them are under the control of the Ministry of Education. They are independent units. Each university has an academic and an administrative board. National policies are established by the Universities' Central Council and the Council of University Academic Bodies which are chaired by the Minister of Education. All institutions are State-financed. A nominal fee is charged for studies.

Myanmar offers a wide range of tertiary level education, adapting the length of each qualification to the needs of the subject. It further offers many certificates who are less time consuming.

Quick Facts about the Philippines

Population	99.14 million
GDP	\$ 284.9 billion
Human Development Index	0.668 (115)
Size (Sq. km)	300,000
Gross Enrolment Ratio (%)	36
Higher Education Institutions	1346
Language of Instruction	Filipino, English

Recent Laws/Decrees and Strategic Plans:

Education for all 2015

"The Enhanced Basic Education Act" (2013)

"Institutionalization of the Philippine Qualifications Framework" (2012)

Manual of Regulations for Private Higher Education (2008)

"The Higher Education Modernization Act" (1997)

"The Higher Education Act" (1994)

huge majority of students are enrolled in private HEIs. The **Commission on Higher Education** (CHED) created in 1994 oversees both private and public tertiary schools; the Technical Education and Skills

The Philippines are home to the most Higher Education Institutions in ASEAN. It is further the only country not having any land borders with one of the other ASEAN countries. Due to colonial times, the Higher Education System is influenced by the Spanish, British and American system .

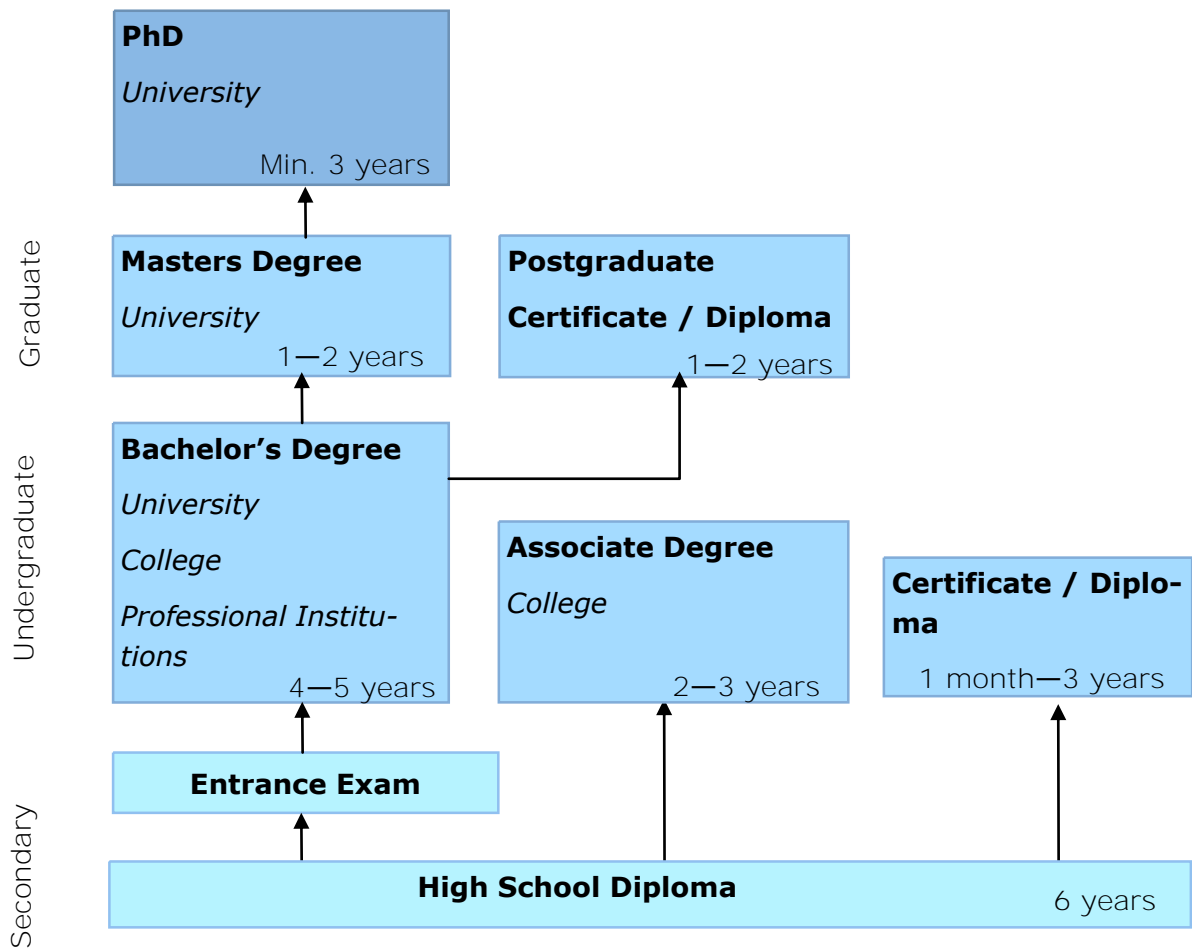

Starting from school year 2011-2012 (with full implementation to be realized in 2017), the Philippines is shifting from 10 years of **primary and secondary education** to compulsory (and free of charge in public schools) one year of Kindergarten + 12 years of basic education composed of 6 years of primary education, 4 years of junior high school and 2 years of senior high school.

Higher education is provided by public and private universities and colleges. The State universities and colleges (SUCs) on which charters have been conferred are autonomous. In terms of enrolment, a

Development. The CHED grants the authority to operate and is in charge of the recognition of higher education institutions' programmes. Quality assurance is conducted through the Institutional Quality Assurance through Monitoring and Evaluation (IQAME) and by one of the 4 accrediting agencies under the umbrella of the Federation of Accrediting Agency of the Philippines (FAAP).

Quick Facts about Singapore

Population	5.470 million
GDP	\$ 307.9 billion
Human Development Index	0.912 (11)
Size (Sq. km)	716
Gross Enrolment Ratio (%)	-
Higher Education Institutions	8
Language of Instruction	English

Recent Laws/Decrees and Strategic Plans:

Private Education Act (Revised 2011) (2009)

Education Act (1957) revised in 1985

Republic Act No. 7722, "The Higher Education Act" (1994)

Education (ITE). There are three publicly-funded universities and five polytechnics.

The **Ministry of Education** has put in place distinctive quality assurance frameworks (QAFs) for its autonomous Universities, Polytechnics, Institute of Technical Education and 2 publicly-funded private arts institutions. **The QAFs seek to encourage institutions' continual self-learning, quality enhancement and development, as well as to ensure accountability for the use of public funds.** Each institution is validated every 5 years and involves an institutional self-assessment, an external validation by an external review panel (comprising local and international academics and industry leaders), and follow-up initiatives by the institutions after the external validation.

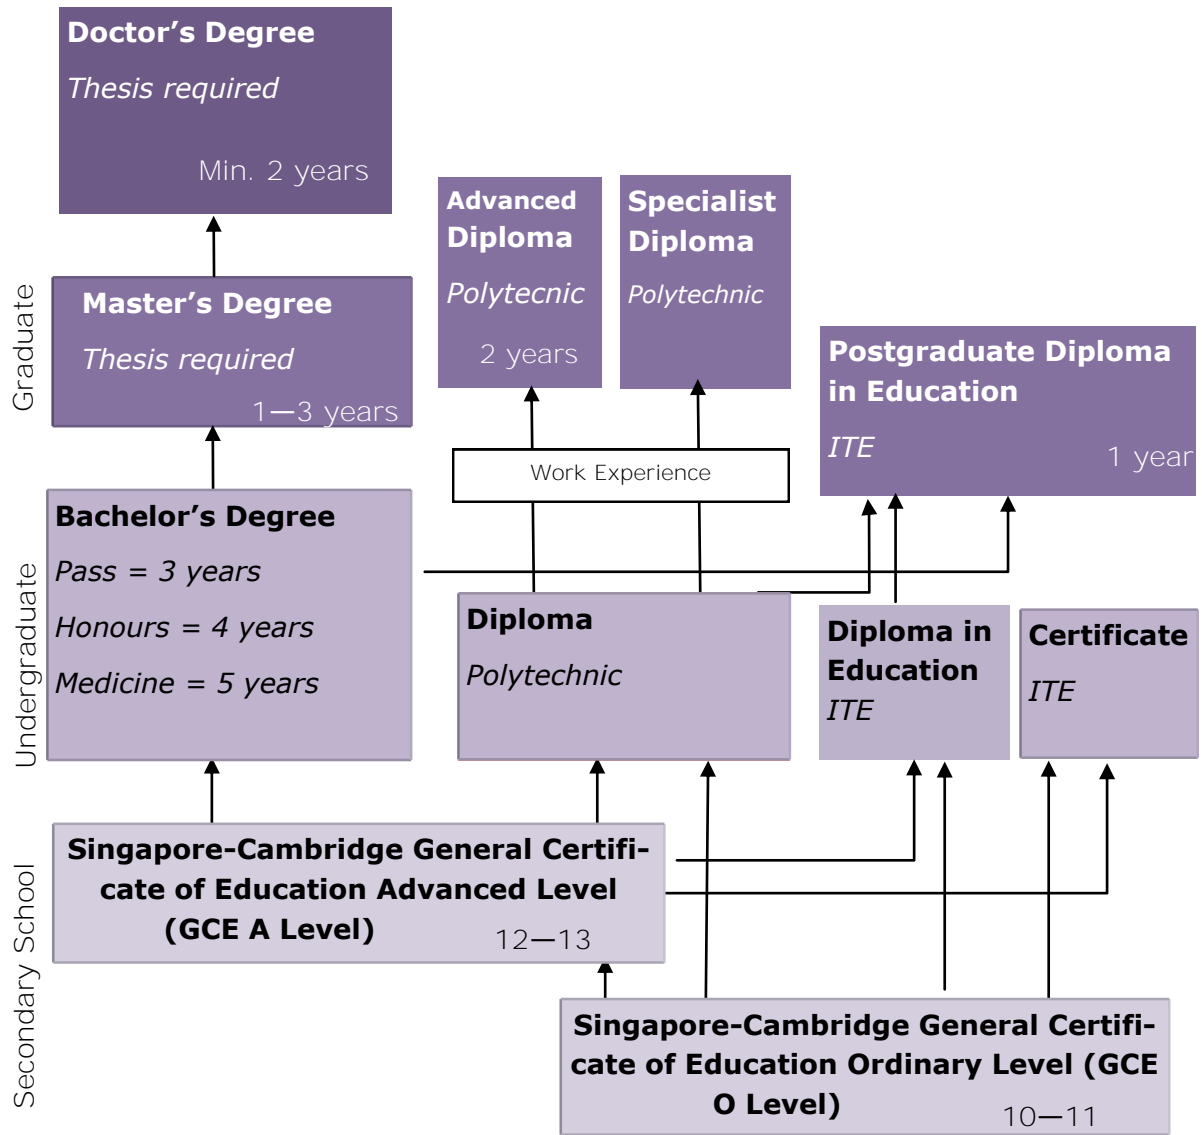

Singapore is in size by far the smallest ASEAN state, yet it has also the strongest economic force, ranging on rank eleven in the Human Development Index. Together with Brunei Darussalam it is considered High Income (nonOECD) by the World Bank. **Singapore's Education system is worldwide recognised and is considered one of the best, due to its lifelong learning approach.**

Primary education lasts for six years and is compulsory. Secondary school pupils are placed in the Special, Express, Normal (Academic) or Normal (Technical) course according to how they performed at the Primary School-leaving Examination (PSLE). Students who complete **secondary education** may proceed to pre-university education at the Junior Colleges/Centralised Institutes or pursue studies at the ITE or the Polytechnics. Pre-university education prepares students for the GCE A-Level examination at the end of the two-year Junior College or three-year Centralised Institute course.

Post-secondary education is provided by three kinds of institutions: universities, polytechnics, and the Institute of Technical

HEDBIB is a database of references on higher education systems, management, planning, policy, and evaluation. It has been maintained by the IAU since 1988, and was redeveloped and upgraded in 2010.

It aspires to be the ultimate source for publications related to Higher Education from around the world. It is accessible and searchable online.

Contact: Amanda Sudic

Quick Facts about Thailand

Population	67.73 million
GDP	\$404.8 billion
Human Development Index	0.726 (93)
Size (Sq. km)	513,120
Gross Enrolment Ratio (%)	51
Higher Education Institutions	150
Language of Instruction	Thai, English

Recent Laws/Decrees and Strategic Plans:

- Second 15-Year Long Range Plan Higher Education (2008-2022) (2008)
- Government Teacher and Education Personnel Act, B.E. 2547 (2004), Amended, B.E. 2550 (2007)
- Private Higher Education Act, B.E. 2546 (2003)
- National Education Act, B.E. 2542 (1999), Amended B.E. 2545 (2002)

levels. The Office of the Higher Education Commission (OHEC), Ministry of Education, is responsible for higher education. The Thai education system is composed of both public and private institutions. Tuition and fees vary from university to university.

Thailand is in the heart of ASEAN, bordering Malaysia, Myanmar, Lao PDR, and Cambodia. Most of the inter-Asian organisations are located in Bangkok, **Thailand's capital**. It is a **Middle Income Country** according to the World Bank.

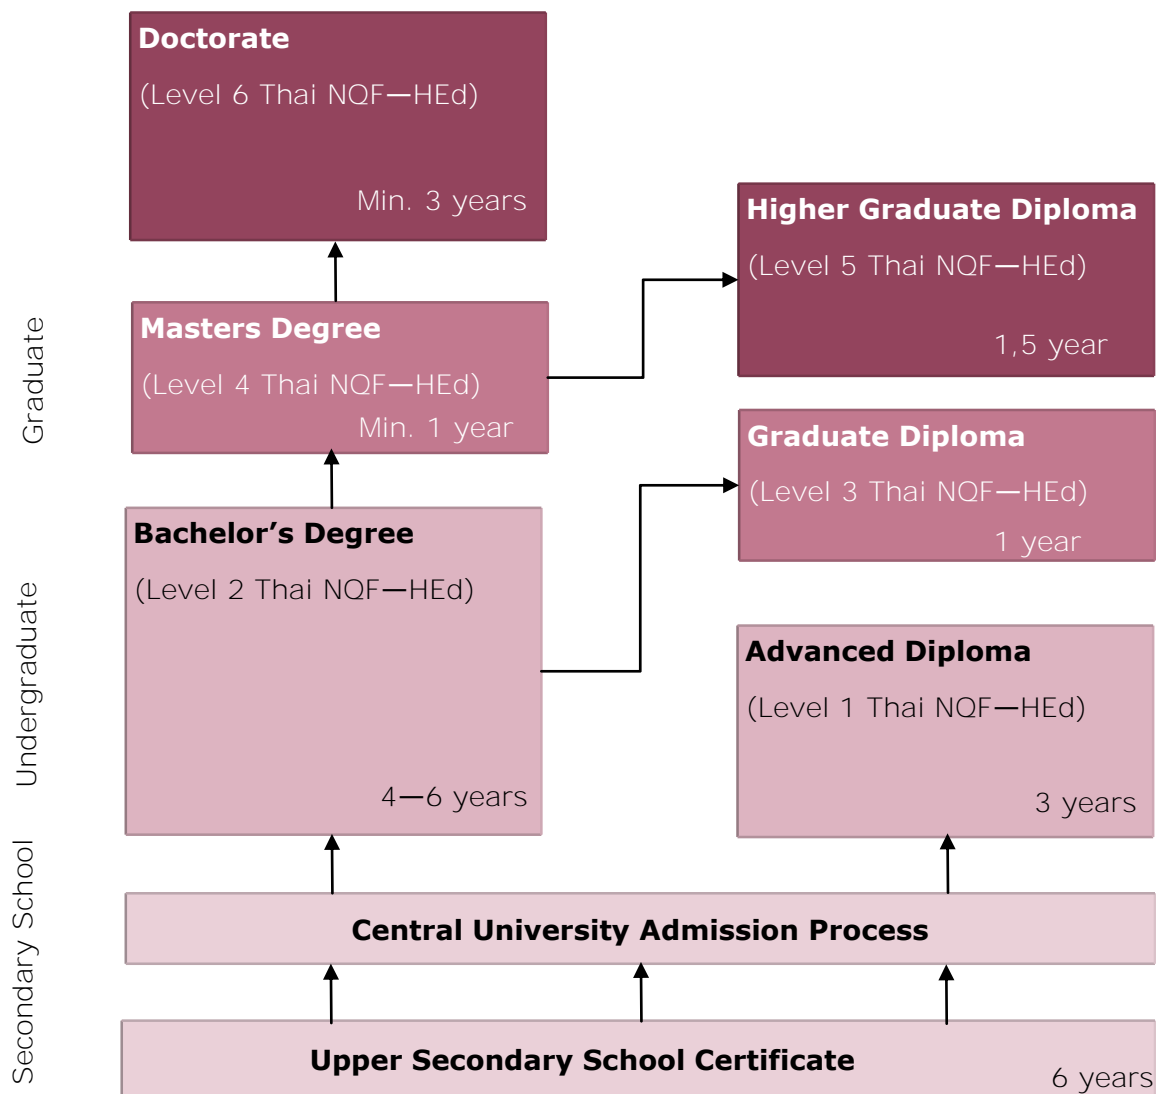

All programmes offered in universities are officially recognized and accredited by the Office of the Higher Education Commission, Ministry of Education. (ONESQA).

Formal education is divided into two levels basic education and higher education. **Basic Education** is free of charge in public schools and divided into three levels (pre-primary, primary and secondary). It follows a 6-3-3 structure where six-year primary (Prathom 1 to 6) and three-year lower **secondary education** (Mathayom 1 to 3) are compulsory. At the **upper secondary** level (Mathayom 4 to 6), schools are divided into 2 major tracks: general (academic), and vocational. At the end of upper secondary school pupils sit for the Upper Secondary School Certificate (Mattayom Suksa 6).

Higher Education is provided at 150 institutions, based on a 15 year long range plan on HE started in 2008. Higher education is divided into two levels; diploma and degree

Quick Facts about Vietnam

Population	90.73 million
GDP	\$ 186.2
Human Development Index	0.666 (116)
Size (Sq. km)	331,212
Gross Enrolment Ratio (%)	30
Higher Education Institutions	70
Languages of Instruction	Vietnamese

Recent Laws/Decrees and Strategic Plans:

- Law on Higher Education - 08/2012/QH13 (2012)
- Law on Vocational Training - 76/2006/QH11 (2006)
- Law on Education - 38/2005/QH11 (2005)

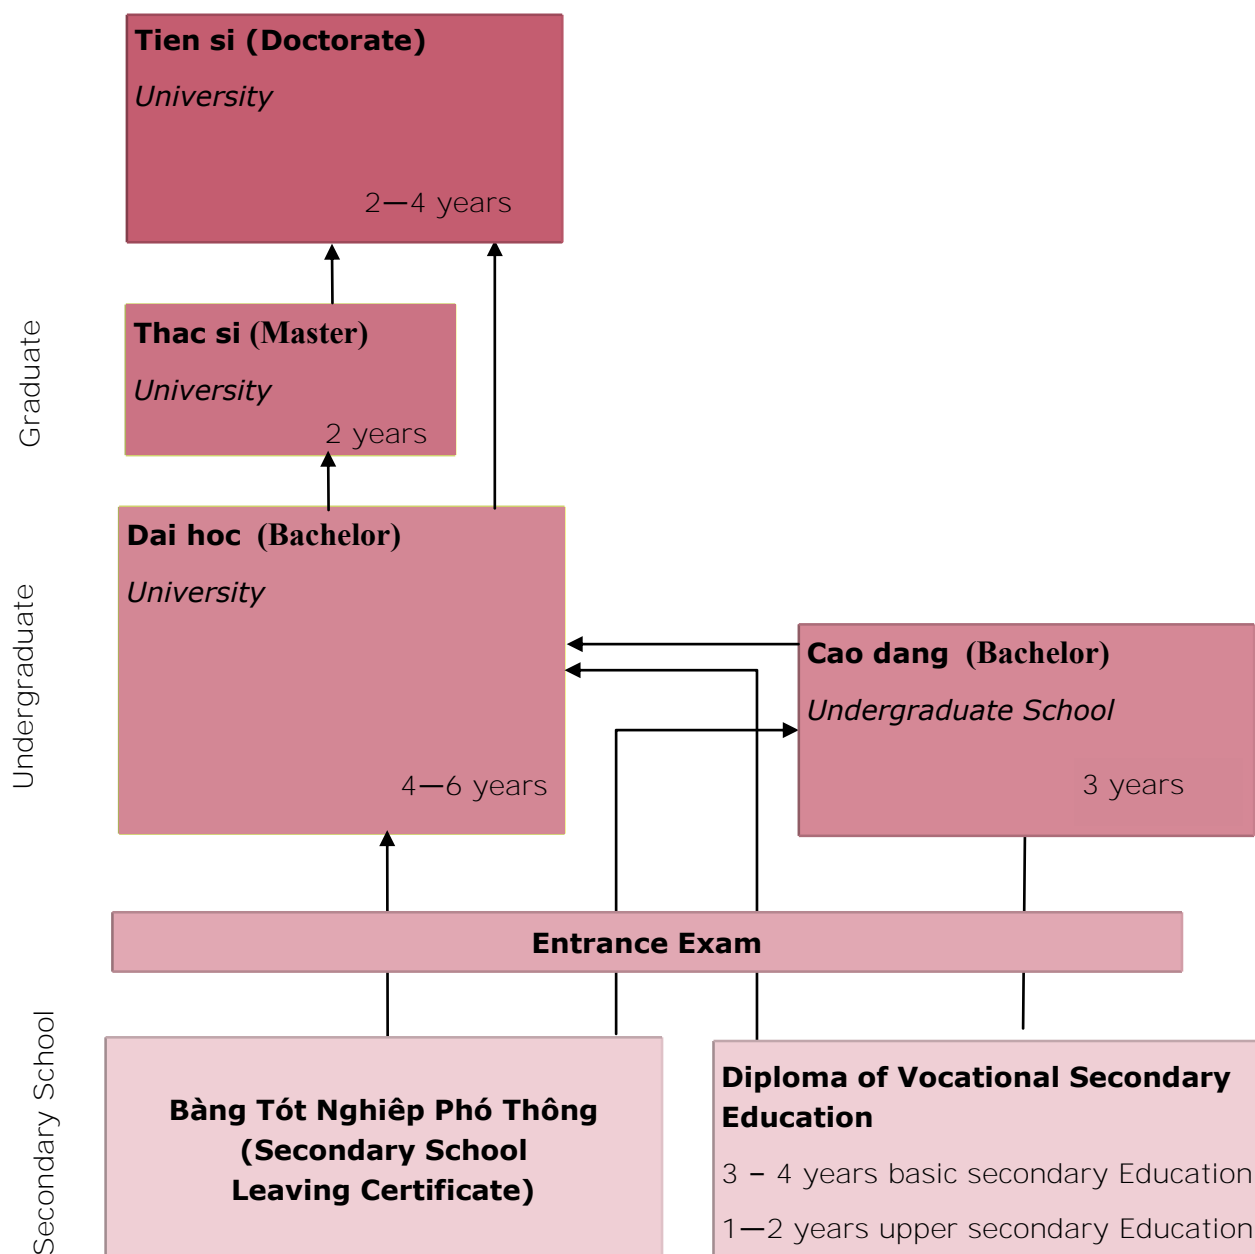

Vietnam embraces Lao PDR and Cambodia and shares a boarder with China. According to the World Bank is Vietnam a Lower Middle Income Country.

Primary education lasts for five years leading to the Certificate of Primary Education. Secondary school education is divided into two cycles: basic secondary and specialized secondary school. Admission to upper secondary school requires passing a competitive entrance examination. There is also technical and vocational secondary education. **Secondary technical schools** provide students with an intermediate level of technical skills. Students are enrolled in vocational training schools at two levels: at the lower level, the duration of courses ranges from less than a year to three years. At the **upper secondary level**, three to four-year courses are offered. Upon graduation, students obtain a diploma. At the end of secondary education, pupils sit for the Bang Tot Nghiep Pho Thong examination administered by the MoET. They then have to pass an entrance examination to know where they will be enrolled.

Vietnam is the only country in ASEAN having two different systems leading to a Bachelor degree: the longer and also to further leading **Dai Hoc** and the **Cao Dang**. **Higher education** is provided by universities and undergraduate schools. It is offered at both public and private institutions. All secondary and higher institutions come under the supervision of the **Ministry of Education and Training (MoET)**, with the exception of the 2 national universities, which come under the supervision of the Prime Minister and regional undergraduate schools, which come under the supervision of the provincial authorities.

Host Universities IAU 15th General Conference

Chulalongkorn University

Chulalongkorn University is one of the oldest Universities in Thailand and was founded in 1917 by King Vajiravudh (Rama VI). In 1917, the university had four faculties: Arts and Sciences, Public Administration, Engineering and Medicine. The university was named after his father, King Chulalongkorn (Rama V), who laid the foundations for modern education in Thailand. It comprises 19 faculties, 11 research institutes, three teaching institutes and four affiliated institutions as well as the Graduate School. The undergraduate student body is 21,825 and there are currently 10,746 students enrolled in Master degree

programs and 2,394 studying for their Doctorate. Chulalongkorn University is ranked the top university in Thailand in every field and is also guaranteed excellent university by Office of Nation Education Standards and Quality Assessment of Thailand. The University has given honorary degrees to heads of state and other international dignitaries, including two U.S. Presidents: Lyndon B. Johnson (October 29, 1966); Bill Clinton (November 26, 1996) and Nelson Mandela (July 17, 1997)

www.chula.ac.th

The Asian Institute of Technology promotes technological change and sustainable development in the Asian-Pacific region through higher education, research and outreach. Established in Bangkok in 1959, AIT has become a leading regional postgraduate institution and is actively working with public and private sector partners throughout the region and with some of the top universities in the world.

Recognized for its multinational, multicultural ethos, the Institute operates as a self-contained international community at its campus located 40km (25 miles) north of downtown Bangkok, Thailand. Besides the usual labs and academic buildings, the main campus includes housing, sports, and medical facilities, a conference centre, and a library with over 230,000 volumes and 830 print and on-line periodicals. All

serve to fulfil AIT's mission which is:

To develop highly qualified and committed professionals who play leading roles in the region's sustainable development and its integration into the global economy. www.ait.ac.th

Siam University was founded in 1965 and is one of the oldest and largest private Universities in Thailand. In 2012, Siam University has received National Best Coop. Award Institute by Thai Minister of Education. Siam University three main pillars are Employability, Sustainability, and Diversity. The university is comprised of 12 schools which offer a broad variety of undergraduate, graduate and

lifelong education programs. The entire international program use English as medium of instruction. The student body consists of around 15,000 students with the evidence 81,000 graduates in various fields of specialization. Siam University is ranked third amongst private universities for its international student population, and a member of AACSB.

Suranaree University of Technology

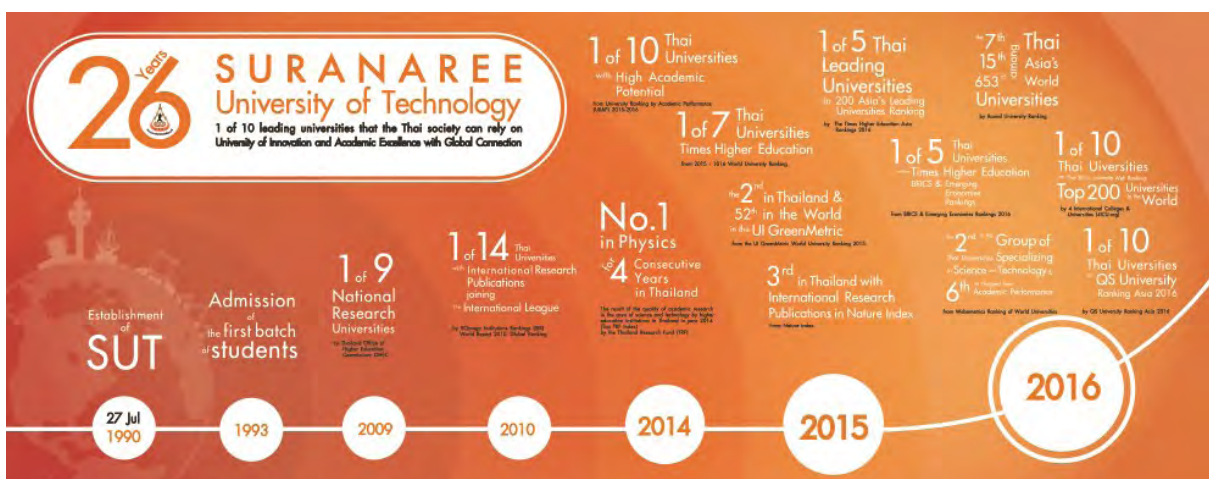

Suranaree University of Technology (SUT) was established in 1990 as the first public autonomous university in Thailand under the supervision of the Royal Thai Government. It prides itself in promoting administrative effectiveness and efficiency in its operations. SUT is a scholarly community consisting of the learned and the learners, as well as all kinds of knowledge in sciences, and technology, beneficial to both individuals and society.

Suranaree University of Technology, specialising in science and technology, is determined to produce graduates with quality, knowledge, and integrity leading to wisdom; to create impactful research outputs; to provide academic services to the public through its engagement mission: to adapt, transfer, and develop technology for the sustainable progress of society; and to preserve and enrich the art and culture by adhering to the principles of academic freedom and good governance in the administration.

In 2016, at the young age of 26, Suranaree University of Technology was ranked in the top 13 of Thailand's universities in the QS University Ranking: Asia. Also, SUT was ranked by Times Higher Education (THE) the 5th in Thailand, the 10th in ASEAN, and in 161st-170th in Asia. These rankings highlight the rapid advancement of SUT and also confirm SUT's academic potential and capacity that will lead it to the status of a World Class University in the near future.

IAU thanks SUT for sponsoring this publication.

Higher Education Systems in ASEAN is an IAU publication prepared on the occasion of the 15th IAU General Conference held in 2016 in Bangkok, Thailand on the theme: ***Higher Education: A catalyst for innovative and sustainable societies***.

This theme is of utmost relevance, taking into consideration the Agenda 2030 and the Sustainable Development Goals, particularly Goal number four. As a community, ASEAN is growing in importance and higher education institutions in the ten member countries are and will continue to play an essential role in ensuring that the integration process serves society.

The present publication offers a glimpse at the highly diverse systems of higher education and lists the numerous and growing number of Higher Education institutions in ASEAN as included in IAU's World Higher Education Database (WHED).
